

## Marks Average calculation

**Title:** Implementation of scanner class using marks Average calculation program.

**Aim :** To develop a Java program to accept marks of five subjects and calculate the total marks and average marks of a student.

### Software requirements:

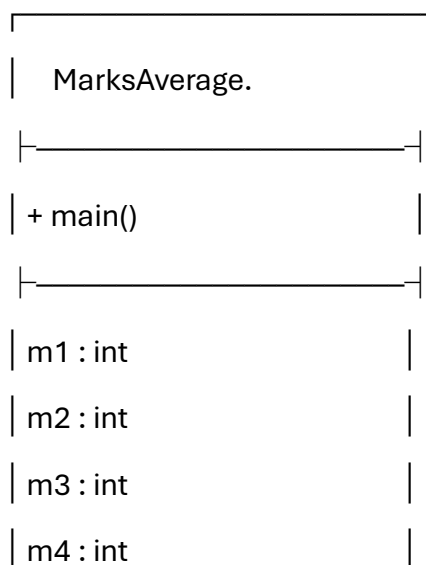

**Software:** Java JDK, VS Code / Eclipse IDE , Windows Operating System

**Hardware :** Computer/Laptop, Minimum 4 GB RAM , Keyboard, Monitor

### Algorithm :

1. Start the program.
2. Import the Scanner class.
3. Create a Scanner object to read input from the user.
4. Read the marks of five subjects.
5. Add the five marks to calculate the total marks.
6. Divide the total marks by 5.0 to calculate the average.
7. Display the total marks.
8. Display the average marks.
9. Close the Scanner.
10. Stop the program.

### UML Diagram :

|                      |  |
|----------------------|--|
| m5 : int             |  |
| total : int          |  |
| average : double     |  |
| └──────────────────┘ |  |

### Source Code :

```
import java.util.Scanner;

public class MarksAverage {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        // Read marks of five subjects

        System.out.print("Enter marks of Subject 1: ");
        int m1 = sc.nextInt();

        System.out.print("Enter marks of Subject 2: ");
        int m2 = sc.nextInt();

        System.out.print("Enter marks of Subject 3: ");
        int m3 = sc.nextInt();

        System.out.print("Enter marks of Subject 4: ");
        int m4 = sc.nextInt();

        System.out.print("Enter marks of Subject 5: ");
        int m5 = sc.nextInt();

        // Calculate total and average marks

        int total = m1 + m2 + m3 + m4 + m5;

        double average = total / 5.0;

        System.out.println("Total Marks = " + total);

        System.out.println("Average Marks = " + average);

        sc.close();
    }
}
```

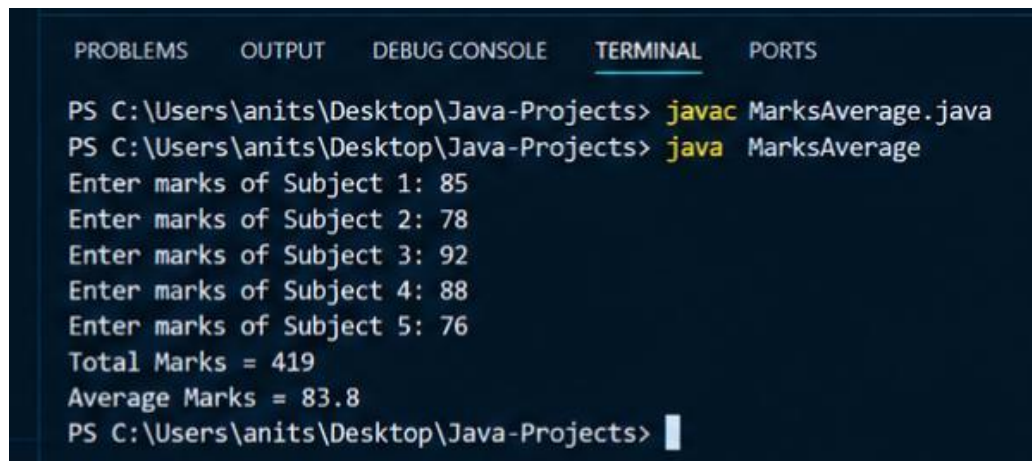

```
}  
}
```

### Compilation & Execution Commands :

**Compilation:** javac MarksAverage.java

**Execution:** java MarksAverage

### Output screenshot:

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS  
PS C:\Users\anits\Desktop\Java-Projects> javac MarksAverage.java  
PS C:\Users\anits\Desktop\Java-Projects> java MarksAverage  
Enter marks of Subject 1: 85  
Enter marks of Subject 2: 78  
Enter marks of Subject 3: 92  
Enter marks of Subject 4: 88  
Enter marks of Subject 5: 76  
Total Marks = 419  
Average Marks = 83.8  
PS C:\Users\anits\Desktop\Java-Projects> |
```

**Result :** The Marks Average Calculation program was successfully implemented in Java. The program accepts marks of five subjects and successfully calculates and displays the total marks and average marks of the student.
